

Nuclear Medicine Radiologist / Physician

The organisation and facilities

Perth Radiological Clinic (PRC) is Western Australia's oldest established private radiology practice and has been providing diagnostic imaging service to the Western Australian community since 1948.

Employing over 830 staff and doctors, we are now one of the largest independent medical imaging practices in Australia with 20 suburban, public and private hospital sites, offering a full range of radiology services including 6 comprehensive nuclear medicine sites with the latest in PET-CT and SPECT-CT technology.

We are committed to delivering the highest quality medical imaging services to our patients and referring doctors whilst maintaining the highest quality level of patient care.

We have an excellent opportunity for a motivated Nuclear Medicine Radiologist / Physician to join our dynamic practice providing diagnostic imaging services.

We offer

1. Excellent remuneration commensurate with your experience and skills
2. Relocation assistance (if required)
3. Hospital based and private practices
